THE AMERICAN ORNITHOLOGISTS' UNION

CHECK-LIST OF NORTH AMERICAN BIRDS,

SECOND EDITION, THOROUGHLY REVISED.

The preface to this work defines its scope and object and includes selections from the A. O. U. Code of Nomenclature, of special importance in the present connection. The table of contents consists of a systematic list of the orders, suborders and families of North American birds. The Check-List proper gives the scientific and common name, number in previous check-lists, and geographical distribution of the 1,068 species and subspecies, constituting the North American Avifauna. This is followed by a list of birds of doubtful status, and a list of the fossil birds of North America.

This new edition has been carefully revised; the recent changes in nomenclature, and species and subspecies described since the publication of the first edition in 1886, are included, while the portion relating to geographical distribution has been much amplified.

Mr. A. J. CAMPBELL (Melbourne, Australia)

Begs to announce to his brother Ornithologists and Oölogists of America that he has completed the MSS. of his life-long work on the

"Nests and Eggs of Australian Birds,"

including the Geographical Distribution of the species and observations thereon, written in popular language. The letter press will cover about 750 pages, royal octavo.

The work, which includes field observations extending over a period of 30 years, 130 photographic illustrations of birds, nests, and nesting scenes, and 200 chromo-lithographic figures of eggs, will be the most complete ever published on the domestic history of Australian birds.

The prospectus and order form may be obtained from the author, H. M. Customs, Melbourne, or from Mr. Edw. W. Petherick, F. L. S., 85 Hopton Street, Streatham, London, S. W.

It is expected the publishing price will not exceed two guineas or ten dollars.
